

GE Fanuc 18i MB CNC Control

Jig Grinders

The GE Fanuc 18 is a compact set of FA-oriented CNC's that GE Fanuc has developed based on concentrated leading edge CNC Technologies. It enables high speed, precise and efficient machining capabilities.

features

- Compact CNC control unit realized by using the three-dimensional high-density mounting technology. This technology enables electronic components to be mounted on a printed circuit board at high density, thereby reducing the size of the control unit.
- Easy to understand display facilitating maintenance and operation.
- Fiber optic cables to interface with servos and spindles.

productivity standards

- INTEL 566 MHZ Processor
- 128 MB SDRAM
- 30 GB Hard Drive
- LCD Resistive Touch Screen Monitor
- Industrial Sealed Keyboard
- 3.5" Floppy Drive
- Windows Professional
